1 SASE & Zero Trust: The Convergence

During our first session with Netskope Chief Strategy Officer, Jason Clark and Anthem CISO, Dustin Wilcox, we explained how the convergence of SASE architecture and Zero Trust are the cornerstones of tomorrow's cloud infrastructure and contextually driven security strategies. We covered everything from the long-term business benefits of this convergence to the real-world use cases that are establishing the framework for a cloud-based future.

2 SASE 101 for Security Practitioners

SASE is not any one tool or software program. It's an ecosystem of security services that live within a global cloud-based environment. In this session we learned all about the key network and security components of SASE, as well as put together the pieces of how you can start building your own SASE-ready architecture.
